# **TCEQ Interoffice Memorandum**

**To:** Tony Walker

Director, TCEQ Region 4, Dallas/Fort Worth

Alyssa Taylor

Special Assistant to the Regional Director, TCEQ Region 4, Dallas/Fort Worth

From: Allison Jenkins, MPH

Toxicology Division, Office of the Executive Director

**Date:** August 30, 2016

**Subject:** Toxicological Evaluation of Results from an Ambient Air Sample for Volatile

Organic Compounds collected Downwind of EnerVest Operating, LLC - Rolling Hills Site (Latitude 32.761302, Longitude -97.111589) in Arlington, Tarrant

County, Texas

Sample Collected on June 23, 2016, Request Number 1606016 (Lab Sample

1606016-001)

## **Key Points**

• Reported concentrations of target volatile organic compounds (VOCs) were either not detected or were detected below levels of short-term health and/or welfare concern.

## **Background**

On June 23, 2016, a Texas Commission on Environmental Quality (TCEQ) Region 4 air investigator collected a 30-minute canister sample (Lab Sample 1606016-001) downwind of EnerVest Operating, LLC - Rolling Hills Site in Arlington, Tarrant County, Texas (Latitude 32.761302, Longitude -97.111589). The sample was collected in response to a handheld VOC reading. The investigator experienced an odor described as a moderate exhaust/condensate/produced water odor but no health effects while sampling. The investigator noted that compressor engine exhaust and venting from produced water/condensate storage tanks could have affected the sample. Meteorological conditions measured at the site or nearest stationary ambient air monitoring site indicated that the ambient temperature was 83°F with a relative humidity of 72%, and winds were from the west (260°) at 3.7-5.5 miles per hour. The sampling site was 100 feet or less from the possible source, while the nearest location where the public could have access was greater than 501 feet from the possible emission source (multiple emission sources). The sample was sent to the TCEQ laboratory in Austin, Texas, and analyzed for a range of VOCs. The list of the target analytes that were evaluated in this review is provided in Attachment A. The VOC concentrations were reported in parts per billion by volume (ppbv)

Tony Walker et al. Page 2 August 30, 2016

(Attachment B and Table 1). Please note that the available canister technology and analysis method cannot capture and/or analyze for all chemicals.

#### **Results and Evaluation**

Reported VOC concentrations were compared to TCEQ's short-term health- and/or welfare-based air monitoring comparison values (AMCVs) (Table 1). Short-term AMCVs are guidelines used to evaluate ambient concentrations of a chemical in air and to determine its potential to result in adverse health effects, adverse vegetative effects, or odors. Health AMCVs are set to provide a margin of safety and are set well below levels at which adverse health effects are reported in the scientific literature. If a chemical concentration in ambient air is less than its comparison value, no adverse health effects are expected to occur. If a chemical concentration exceeds its comparison value it does not necessarily mean that adverse effects will occur, but rather that further evaluation is warranted.

All of the 84 VOCs were either not detected or were detected below their respective short-term AMCVs. Exposure to levels of VOCs measured in this sample would not be expected to cause short-term adverse health effects, adverse vegetative effects, or odors.

Please call me at (512) 239-0656 you have any questions regarding this evaluation.

#### Laboratory Analysis Results Request Number: 1606016

Region: T04

Date Received: 6/28/2016

Project(s): Barnett Shale

Facility(ies) Sampled	City	County	Facility Type
EnerVest Operating, LLC- Rolling Hills Site	Arlington	Tarrant	

Sample(s) Received

Field ID Number: 00200-069-0616

Laboratory Sample Number: 1606016-001

Sampled by: Aimi Tanada

Sampling Site: Rolling Hills Site Date & Time Sampled: 06/23/16 09:04:00 Valid Sample: Yes

Comments: Canister 00200 was used to collect a 30-minute downwind sample using OFC-069.

Requested Laboratory Procedure(s):

Analysis: AP001VOC

Determination of VOCs in Canisters by GC/MS Using Modified Method TO-15

Please note that this analytical technique is not capable of measuring all compounds which might have adverse health effects. For questions on the analytical procedures please contact the laboratory manager at (512) 239-1716. For an update on the health effects evaluation of these data, please contact the Toxicology Division at (512) 239-1795.

### Laboratory Analysis Results Request Number: 1606016 Analysis Code: AP001VOC

#### Qualifier Notes:

- ND not detected
- NQ concentration can not be quantified due to possible interferences or coelutions.
- SDL Sample Detection Limit (Limit of Detection adjusted for dilutions).
- SQL Sample Quantitation Limit (Limit of Quantitation adjusted for dilution).
- J Reported concentration is below SDL.
- L Reported concentration is at or above the SDL and is below the lower limit of quantitation.
- E Reported concentration exceeds the upper limit of instrument calibration.
- M Result modified from previous result,
- T- Data was not confirmed by a confirmational analysis. Compound and/or results is tentatively identified P Established acceptance criteria was not met due to factors outside the laboratory's control.
- H Not all associated hold time specifications were met. Data may be biased.
- C Sample received with a missing or broken custody seal.
- R Sample received with a missing or incomplete chain of custody.

  I Sample received without a legible unique identifier.
- G Sample received in an improper container,
- U Sample received with insufficient sample volume.
- W Sample recevied with insufficient preservation.

Quality control notes for AP001VOC samples,

- D1-Sample concentration was calculated using a dilution factor of 4.02.
- D2-Sample concentration was calculated using a dilution factor of 16.04.

<sup>\*</sup>A simple asphyxiant displaces air, lowering the partial pressure of oxygen and causing hypoxia at sufficiently high concentrations. ppbv - Parts per billion by volume.

ND - Not detected.

NQ - Concentration can not be quantified due to possible interferences or coelutions.

SDL - Sample Detection Limit (Limit of Detection adjusted for dilution).

SQL – Sample Quantitation Limit (Limit of Quantitation adjusted for dilution).

INV - Invalid.

J - Reported concentration is below SDL.

L - Reported concentration is at or above the SDL and is below the lower limit of quantitation.

E - Reported concentration exceeds the upper limit of instrument calibration.

M - Result modified from previous result.

T - Data was not confirmed by a confirmational analysis. Data is tentatively identified.

F - Established acceptance criteria were not met due to factors outside the laboratory's control.

H – Not all associated hold time specifications were met. Data may be biased.

C - Sample received with a missing or broken custody seal.

R - Sample received with a missing or incomplete chain of custody.

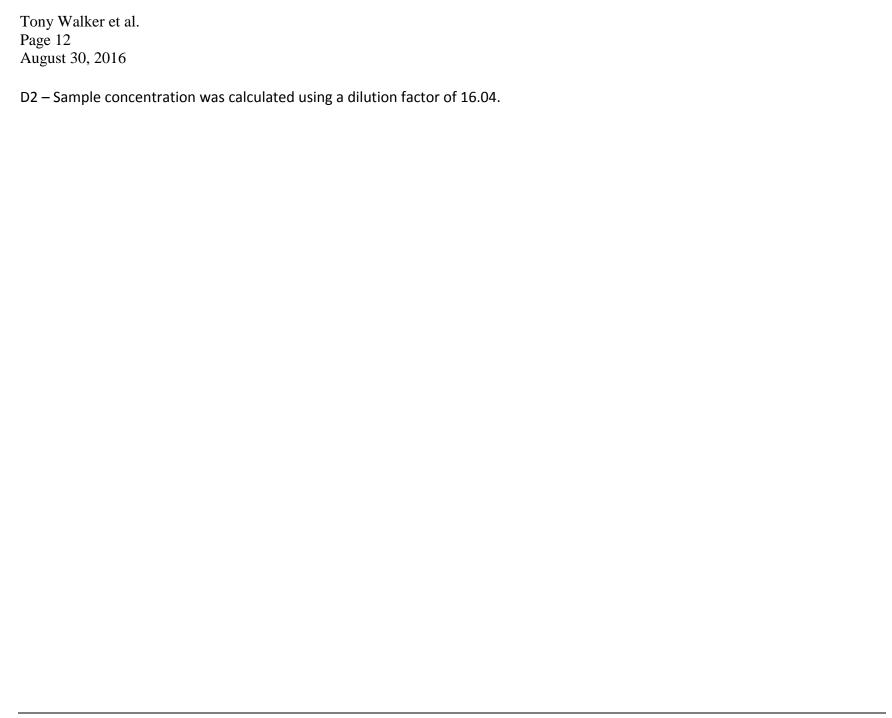

I - Sample received without a legible unique identifier.

G - Sample received in an improper container.

U - Sample received with insufficient sample volume.

W - Sample received with insufficient preservation.

D1 - Sample concentration was calculated using a dilution factor of 4.

**Table 2. TCEQ Long-Term Air Monitoring Comparison Values (AMCVs)** 

Please Note: The long-term AMCVs are provided for informational purposes only because it is scientifically inappropriate to compare short-term monitored values to the long-term AMCV.

Compound	Long-Term Health AMCV (ppb <sub>v</sub> )	Compound	Long-Term Health	
1,1,1-Trichloroethane	940	Cyclopentane	120	
1,1,2,2-Tetrachloroethane	1	Cyclopentene	290	
1,1,2-Trichloroethane	10	Dichlorodifluoromethane	1,000	
1,1-Dichloroethane	100	Ethane	*Simple Asphyxiant	
1,1-Dichloroethylene	86	Ethylbenzene	450	
1,2,3-Trimethylbenzene	37	Ethylene**	5,300	
1,2,4-Trimethylbenzene	37	Isobutane	2,400	
1,2-Dibromoethane	0.05	Isopentane (2-methylbutane)	8,000	
1,2-Dichloroethane	1	Isoprene	2	
1,2-Dichloropropane	10	Isopropylbenzene (cumene)	50	
1,3,5-Trimethylbenzene	37	m & p-Xylene (as mixed isomers)	140	
1,3-Butadiene	9.1	m-Diethylbenzene	46	
1-Butene	2300	Methyl Chloride (chloromethane)	50	
1-Pentene	210	Methylcyclohexane	400	
2,2,4-Trimethylpentane	75	Methylcyclopentane	75	
2,2-Dimethylbutane (Neohexane)	100	Methylene Chloride (dichloromethane)	100	
2,3,4-Trimethylpentane	75	m-Ethyltoluene	25	
2,3-Dimethylbutane	99	n-Butane	2,400	
2,3-Dimethylpentane	85	n-Decane	175
